

INHALE®

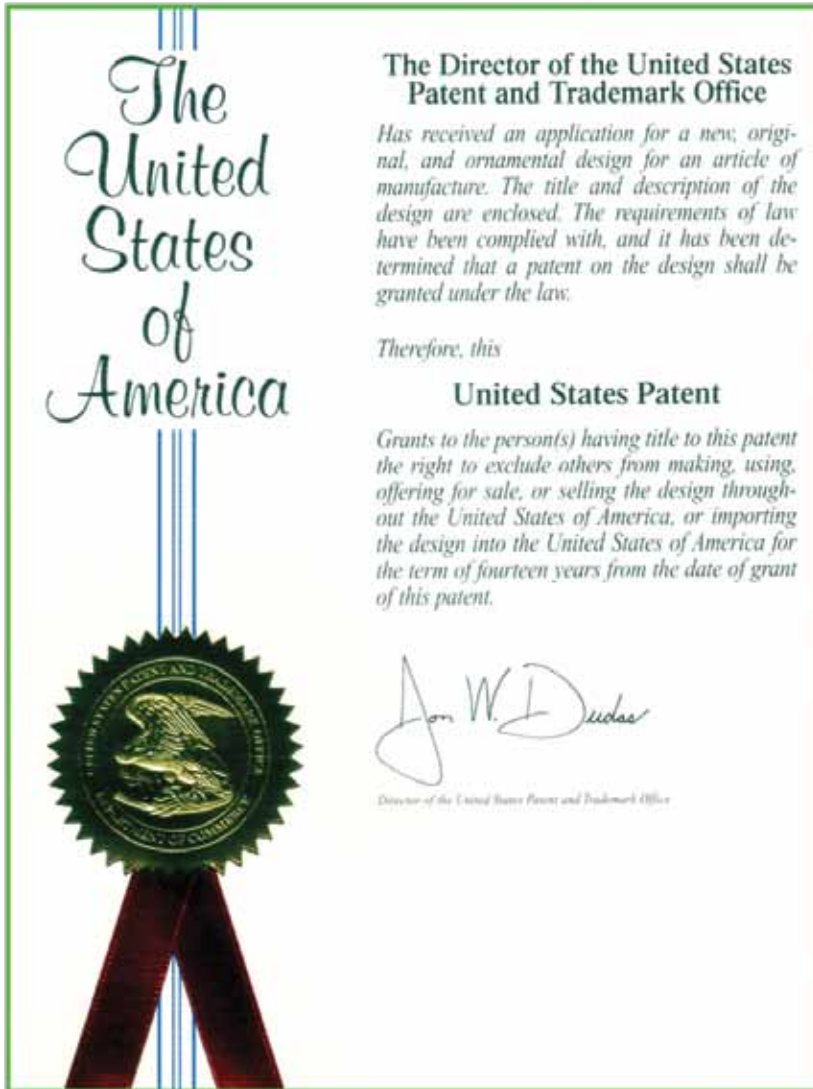

YOUR SMOKE SHOP SPECIALISTS SINCE 1997

PRODUCT CATALOG 2016

WE WELCOME ALL IMPORTERS AND EXPORTERS TO START A LONG AND PROFITABLE RELATIONSHIP WITH US.

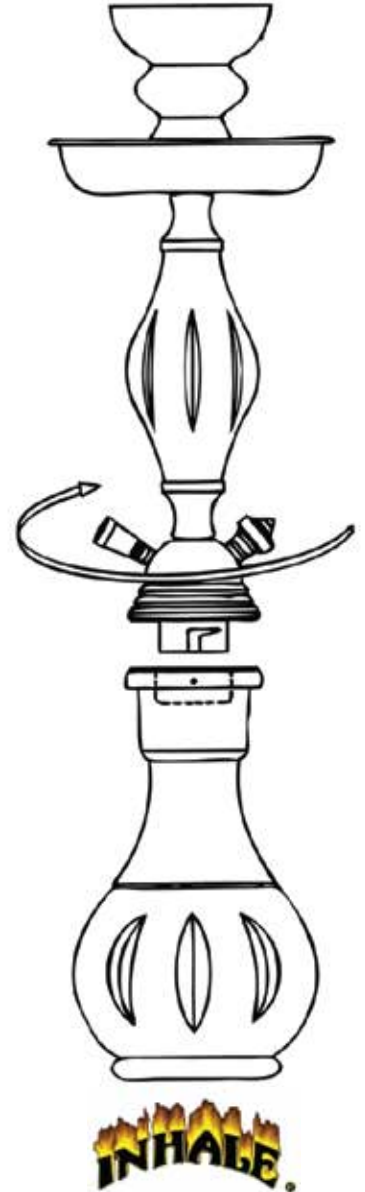

Inhale International, LTD is one of the leading companies specializing in the manufacturing of smoking articles; from tobacco pipes, to water pipes, hookahs, acrylics, wood and metal parts, with the capacity of producing over ten million different metal parts each year. Our production lines are advanced, our workers and technicians are skilled, and we utilize the perfect check equipment and control system to guarantee that our quality is the best in the business. All of our models are engineered and patented by skilled Taiwanese and American designers to put them ahead of all competition. Our products now sell across North America, South America, Europe, and Asia. We have been in the business of smoking articles since 1997, and are one of the foremost knowledgeable distributors the industry, supplying you the products that will move fast for your company.

THANK YOU & CONGRATULATIONS ON YOUR NEW HOOKAH

Rest assured that your hookah is manufactured from the highest quality material and controlled for quality and performance by skilled technicians to bring you the best smoking experience possible

Every hookah comes complete with:
A water container, stem, hose, water stem, ceramic bowl, charcoal tray, charcoal clamp, grommets, and instruction sheet

- 1 Fill the glass vase, so that the water stem is submerged by about 1 - 1/2" into the water.
- 2 Place the hookah stem into the bottle and twist for a perfect air tight lock (if your model is equipped with the worldwide patented interlock system). If your model is equipped with the rubber gasket, force it in place and make sure it is snug and air tight.
- 3 Place the charcoal tray over the stem of the hookah.
- 4 Gently pack your ceramic bowl with the molasses tobacco (Never pack your ceramic bowl too tight, air circulation will be restricted and the draw will be difficult)
- 5 You can either :
A. Place a 3"x3" aluminum foil paper on top of your ceramic bowl, and fit it to be snagged, now you need to poke small holes into the foil paper for air to be circulated.
B. place a hookah metal screen on top of your ceramic bowl (Your metal screen comes already with holes in it).
- 6 Place the filled ceramic bowl on the hookah stem using a rubber grommet (make sure it is secure)
- 7 Hold a piece of charcoal with your charcoal holder, light it up and put it over the ceramic bowl.
- 8 Place your hose into the hose connector using a rubber grommet. Inhale for a minute or two to get the smoke in your new hookah flowing!
