

BOWL

CHARCOAL CLAMP---

Rest assured that your hookah is manufactured from the highest quality material and controlled for quality and performance by skilled technicians to bring you the best smoking experience possible

STEM

Every hookah comes complete with: A water container, stem, hose, water stem, ceramic bowl, charcoal tray, charcoal clamp, grommets, and instruction sheet

HOSE

HOSE GROMMET

1-Fill the glass vase,so that the water stem is submerged By about one to one and a half inches into the water.

2-Place the hookah stem into the bottle and twist for a perfect Lock that is air tight (if your model is equipped with the worldwide Patented interlock system).if your model is equippedwith the Rubber gasket,force it in place and make sure it is snug and air tight.

---RUBBER SPACER

3-Place the charcoal tray over the stem of the hookah.

4-Gently pack your ceramic bowl with the molasses tobacco (Never pack your ceramic bowl too tight,air circulation Will be restricted and the draw will be hard)

5-You can either :

Place a 3"x3" aluminum foil paper on top of your ceramic bowl, And fit it to be snagged,now you need to poke small holes Into the foil paper for air to be circulated.

Or:place a hookah metal screen on top of your ceramic bowl (Your metal screen comes already with holes in it).

6- Place the filled ceramic bowl on the hookah stem using a rubber Grommet (make sure it is snagged)

7-Hold a piece of charcoal with you charcoal holder ,light it up And put it over the ceramic bowl.

8-Place your hose into the hose connector using a rubber Grommet. Wait for a minute or two to get your hookah going.

Enjoy one of the world's oldest past time

---WATER CONTAINER
